## Intro

I'm sure you're about to say something like "Oh, that's another one shitcoin popping up" but it's certainly not. Every one shitcoin says that it is the most fast, secure, anonymous, blah, blah, etc, but Sanchezium is not about that at all.

I made Sanchezium — and almost every Rick in almost every timeline did — to use it as a payment between Ricks first, to trade some stuff, buy portal fluid, mega-seeds, or maybe purchase a brand new Morty... So I can say that Sanchezium is the first real interdimensional cryptocurrency. Sure f\*cks running the Citadel of Ricks will start using it too, but I don't care.

Well and it is opensource etc, so you can use it too. Purchase my coins and in you go. It is extremely fast (transaction is confirmed in about 1 minute, full confirmation takes about 10 minutes), absolutely secure and 100% anonymous. Trust me, i'm Crypto Riiick!

And I won't be Rick Sanchez if I don't rize some profit on it, so Sanchezium is about to go to several cryptoexchanges right after the ICO is finished.

Sanchezium is 100% POS cryptocurrency, running on masternodes, so grab your one (or better three) while you can. Sanchezium masternodes are designed to be high-ROI, so you will get a lot even with 300 masternodes running in the network.

Also I have built some fun and prizes into the block generation reward system. Approximately once in a week (every 10080 blocks, actually) block reward is set to 500 SNCZ, and some lucky bastard gets schwifty.

Ow, and before I forget — POS reward also gets a bit higher when the number of blocks increases to keep ROI high and shining. Yeah, looks like that's all.

## Specifications

Max coin supply	27 182 818 (exactly the base of the natural logarithm, multiplied by 1 000 000)
Premined	1 400 000 (5%)
First POS block	141
Block time	about 60 seconds or so
Max block size	3 MB
Staking age	24 hours
Ticker	SNCZ
Coin type	pure POS after premine
Algorithm	scrypt
Masternode price	2500 SNCZ
Difficulty retargeting	every block
Fun and prizes	500 SNCZ are given randomly every week
0-10080 block reward	16 SNCZ
10080-40320 block reward	17 SNCZ
40320-80640 block reward	18 SNCZ
80640-120960 block reward	20 SNCZ
120960 and higher block reward	24 SNCZ

## Fun and prizes

We're all sick of standard shitcoins all looking the same, so I have built some, uhm, motivating thing into Sanchezium block reward system.

Here it comes:

```
int64_t  GetProofOfStakeReward(const  CBlockIndex*  pindexPrev,
int64_t nCoinAge, int64_t nFees)
{
    int64_t nSubsidy = STATIC_POS_REWARD;
    int nHeight = pindexPrev->nHeight + 1;
    if(nHeight % 10080 == 0 && nHeight >= 10080)
    {
        nSubsidy = 500 * COIN;
    }
    else
    {
        if (nHeight <= 10080) {
            nSubsidy = STATIC_POS_REWARD;
        }
        else if (nHeight <= 40320 && nHeight > 10800) {
            nSubsidy = 17 * COIN;
        }
        else if (nHeight <= 80640 && nHeight > 40320) {
            nSubsidy = 18 * COIN;
        }
        else if (nHeight <= 120960 && nHeight > 80640) {
            nSubsidy = 20 * COIN;
        }
        else {
            nSubsidy = 24 * COIN;
        }
    }
    return nSubsidy + nFees;
}
```

So, as you can see, every 10080 blocks (about one week) some lucky bastard gets 500 SNCZ and gets schwifty with it.

Also block reward grows every month for first four months, which is vital for POS masternode coin.

## ICO

Purchase some coins and in you go — now you're part of the show!

Sanchezium ICO is **on**. ICO will be divided into three phases.

Phase 1. Sale with 50% off

250 000 SNCZ will be sold for 50 cents per 1 SNCZ. Hurry.

Phase 2. Sale with 25% off

Another 250 000 SNCZ will be sold for 75 cents per 1 SNCZ.

Phase 3. Full price sale

Remaining 500 000 SNCZ will be sold for 1 USD per 1 SNCZ.

How to take part in ICO

All you need is Sanchezium address and some BTC or ETH to trade for SNCZ. You will get your purchased amount of Sanchezium automatically (Morty is responsible for it actually) right after system gets confirmation of your payment.

**Just go to <http://sanchezium.com/ico> and you will get how to buy some SNCZ, it's all simple.**

Note

As you might have noticed, total premine is 1 400 000 SNCZ, and only 1 000 000 will be sold during the ICO.

200 000 SNCZ will be reserved as the bounty fund, and everything remaining unspent of it will be burned right after the ICO ends.

The other 200 000 SNCZ will form the technical reserve and...  
Whoa! Will be sent to Adult Swim on May 2018 to persuade them to FINALLY START MAKING SEASON 4 OF MY SHOW!!!

## Roadmap

### Phase 1

---

Right now

Start of the marketing and bounty campaigns. Release of the wallets.

### Phase 2

---

After the wallets are released

ICO. Shop till you drop.

### Phase 3

---

Right after the ICO

Public listings:

- [masternodes.online](http://masternodes.online);
- [yobit.net](http://yobit.net);
- [hitbtc.com](http://hitbtc.com);
- [coinexchange.io](http://coinexchange.io);
- [coinsmarkets.com](http://coinsmarkets.com);
- [cryptopia.co.nz](http://cryptopia.co.nz).

### Phase 4

---

Right after listing

Start of the active development with community involved:

- development of the mobile app;
- development of the cross-platform electron wallet;
- development of the cross-platform multi-currency electron wallet.

### Phase 5

---

After the Phase 4

Multiverse domination
